SOLAR BILL GUIDE

- 1 Production Meter Read Detail**
The total solar energy your system produced. It is not used to calculate your bill. The production meter kWh read does not have a “+” or “-” in front of it.
- 2 Energy Charge**
The total cost to you of the electric energy (kilowatt-hours) consumed and billed under the applicable rate.
- 3 Grid Energy Delivered by City Light to Customer (+ kWh Usage)**
The total grid energy you used from City Light.
- 4 Solar Energy Received by City Light from Customer (- kWh Usage)**
The total solar energy you delivered to the City Light grid.
- 5 Block Rate**
Grid energy delivered by City Light is charged at different rates dependent on the season and amount of kWh used per day. Additional rate information can be located at seattle.gov/light/rates.

Questions on your bill?

GLOSSARY OF TERMS

Base Service Charge

A fixed charge that covers basic utility costs to provide customer service, customer accounting, billing, credit, collections, meters, meter reading, and outreach services.

Block Rate

A rate structure where the price per kilowatt-hour (kWh) or kilowatt (kW) changes at different levels of consumption or demand. For example, the first 300 kWh of use per month are charged at one rate, and kWh over 300 are charged at a different rate.

Energy Charge

The amount charged based upon the electric energy (kilowatt-hours) consumed.

Kilowatt-Hour (kWh)

A kilowatt-hour is a measure of electric energy equal to one kilowatt of power supplied to or taken from an electric circuit for one hour. A kilowatt-hour could be used to light a 100-watt bulb for 10 hours.

kWh Credit

A kWh of solar energy delivered to the City Light grid through net metering and stored on the customer account for credit toward future bills.

+ kWh Usage

Grid energy delivered by City Light to customer. The kWh next to the “+” shows how much grid energy the customer used from City Light.

- kWh Usage

Solar energy received by City Light from customer. The kWh next to the “-” shows how much solar energy the customer delivered to the City Light grid.

Production Meter

An electric meter that records the total kilowatt-hours produced by a solar or other renewable energy system. It is not used to calculate a customer's City Light bill.
